

Planet Charter To re-enchant the world And "love my being" I engage freely

During my stay at the Planet, I commit to:

♥ to favor a state of interiority, of self-observation, of consciousness, in order to overcome my automatisms, and to promote an attitude of interior vigilance.

♥ to exercise my benevolence in my thoughts, my words and my actions. For that, I commit myself to be in an active process of conflict resolution and to ask for help if I need it.

During my stay at the Planet, I commit to showing benevolence, taking care of myself and all living beings (plant, animal, human).

♥ I undertake to exclude from the Planet, any possession and consumption of stimulants or substances modifying consciousness (tobacco, alcohol, etc.)

During my stay at the Planet, I agree to follow the vegetarian diet of the place. (Animals are not affected.)

During my stay at the Planet Farm,

♥ I am committed to experience a life in the service of the collective interest and to work for harmony and peace to reign.

♥ I undertake to keep my private space clean and harmonious and possibly improve it

♥ I make a commitment to organize and to respect the spaces and the times of rest so that my needs and those of each one are respected.

Permanents are united by the energy of respect and love for life. Talking circles allow everyone to express and share their feelings and ask questions in a spirit of respect for differences and solidarity.

- I agree to participate in the weekly talking circle, and to respect the decisions taken during the talking circles.

The founder of the Planet, guardian of the place for fifty years, is the guarantor of the vision of the Planet and the respect for its smooth running. It may be called upon to decide if satisfactory solutions have not been found or achieved unanimity ...

♥ During my stay on the Planet, I pledge to experience a life of happy sobriety, contentment and gratitude towards life.

And out of respect, to leave this place if I don't feel up to the necessary commitment.
